Education

Nazarbayev Intellectual School (NIS)

Expected Graduation: 2026

Projects

KozbenSal

Smart Glasses for Eye Disease Detection

Developed AI-powered smart glasses using Raspberry Pi to detect eye diseases.
Submitted to NASA SEES x Stardance 2026.

VEya

AI-Powered Smart Glasses

Created smart glasses with AI integration for enhanced visual assistance and disease detection capabilities.

Underwater Drone

Robotics & Hardware Project

Designed and built an underwater drone with Raspberry Pi integration for marine exploration and data collection.

Work Experience

Web Developer - Freelance

Restaurants & Local Businesses

- Developed and deployed websites for restaurants and local businesses
- Implemented responsive designs and user-friendly interfaces

- Managed full development lifecycle from client consultation to deployment

AI Agent Development

Independent Projects

- Built AI agents for automation and intelligent task handling
- Integrated machine learning models for practical applications

Technical Skills

Python

Robotics

Raspberry Pi

AI/ML

Web Development

React

Next.js
